Accomplishment 2018

The College Library commits itself to provide its academic community with essential and appropriate services, required facilities, and balanced collection of materials and resources necessary in meeting the current and future needs of school programs and users' informational, instructional, and personal requirements. This accomplishment report lists the unit's key statistics and achievements for calendar year 2018 in partnership with and in service of CBMA students, Faculty, and administrators.

Accomplishments

Library Hours

To serve the information needs of the academic community, the library is open Monday to Friday, 8:00 AM to 7:00 PM and Saturday, 8:00 AM to 5:00 PM. The library is accessible to its users for 64 hours a week.

Admission/Attendance Report

Table 1 presents the Library Users Admission Report by type of users and by month. The data shows that the College Library was able to serve 61,616 customers in CY 2018.

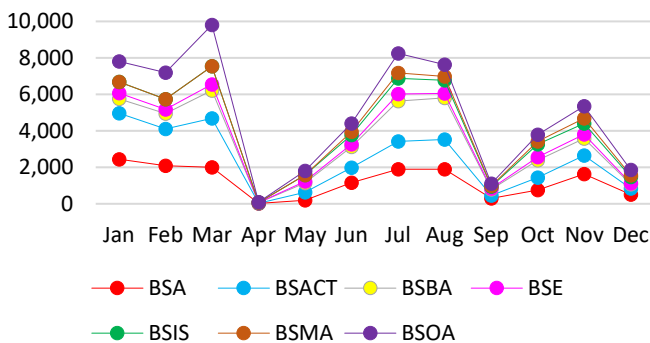

Figure 2. Admission/Attendance Report Undergraduate by Month

Graduate Program, a total of 1,316 students visited the library for their research and other needs. The Master in Business Administration student's frequent library users with 855 in admission. The Master in Public Administration students have only a library attendance record of 461. The data further suggests that the library services and holdings for the advanced courses are more enticing to the MBA students hence motivated them to go to the library every Saturday.

In a calendar year, as reflected in the Table 1 & Figure 4, data shows that there are 843 faculty members who visited the library for various reasons like to avail the circulation, reference, photocopy and internet services. Likewise, 234 staff and 141 outside researchers were also recorded being in the library for whatever purpose it may serve them best.

Specifically, the data in Table 1 and Figure 1 reveals that students from BS in Accountancy, BS in Accounting Technology, and BS in Business Administration are the top three most numbered library users as indicated by 14,863, 13,885, & 11,735 library visits, respectively.

Figure 2 presents the Library Users Admission Report by Undergraduate program and by month. The data shows that the month of March, July and January are the top three most numbered visited by library users with 9,809, 8,239, & 7,806 library visits respectively.

Table 2 presents the Summary of Borrowing Transactions of the Library Users. The data shows that the College Library was able to serve 22,178 customers in CY 2018. The data of the user's access to books collections in the Reserve, Circulation, Graduate School and Filipiniana Sections are presented and further analyze for program improvement.

Internet and Computer-Aided Research Utilization Report

A total of 33,837 library users accessed online information through Internet, WIFI and Mobile Learning Services to complete their assignments, research works, and other academic requirements. This implies that students most likely find these library services as a tool that aid their learning needs.

Figure 6. Summary of Internet and Computer-Aided Research Utilization

Specifically, Table 4 presents the Internet Access Utilization Report. The data shows that students of BS in Office Administration, BS in Business Administration and BS in Accounting Technology, were the top 3 courses with 10,229, 7,685, and 5,572 frequencies. This entails high demands of accessing online information for academic requirement's completion for these programs.

When grouped according to types of services being highly utilized, Figure 7 shows that Internet and Computer-Aided Research Services were the most utilized library services with 56%, followed by Circulation Services with 37% and 7% for Photocopy & Printing Services. This implies that the majority of the library users prefer to access online resources for their research and information needs in the library. The dropped in Circulation Services utilization data from the previous is accounted for this reason. Thus, the management will look into the provision of additional ICT equipment and online databases for the users to access their information to the avenues they are comfortable of.

CARBON FOOTPRINT

**SAVE PLANET EARTH
REDUCE YOUR ECOLOGICAL
FOOTPRINT**

What is a Carbon Footprint?

Your carbon footprint is a measurement of the amount of greenhouse gases produced by the activities in your daily life. One main source of greenhouse gas is burning fossil fuels. That includes the gas in your car and the coal burned at your power plant. Scientists have concluded that humans are producing more greenhouse gases than ever before. These gases trap heat in our atmosphere, causing our planet to warm up and changing our climate.

Your carbon footprint, the amount of potential impact your daily life has on the environment. By reducing the amount of greenhouse gases produced by your lifestyle, you can reduce your footprint and help slow climate change on Earth.

PLEDGE TO GO GREEN

CHMSC FT - LIBRARY
Greening Campaign

A CALL FOR URGENT ACTION TO COMBAT CARBON FOOTPRINT

Man has managed to deteriorate his habitat, the Earth, beautiful and fragile is damaging as result of industrial evolution. If we will not help to repair what can be repaired, what future awaits our children and future humanity? To prepare the future, we will be more conscious and fair. We will work hand in hand to rejuvenate Earth for her to be still capable of providing a shelter for its inhabitants. Today, let us do our share because our planet is running out of steam. Her natural means to compensate men's ecological point is degrading, the natural balance are now altered and the erosion of biodiversity reached its peak level. No one can ignore the fact that Earth has reached our unprecedentedly point of vulnerability and how damage is visible to our naked eye. We have a duty of solidarity towards the next generations. We have to make an immediate actions. According to Seneca, "It's not because things are difficult that we dare not venture, it's because we dare not venture that they are difficult." So, as individual and member of academe/learning institution, we are soliciting your support to lower carbon footprint. Let us pay our ecological compensation by taking a PLEDGE!

ENVIRONMENTAL AWARENESS

TOGETHER LET'S MAKE THIS EARTH BEAUTIFUL

By Kowshik Chanda

Who don't want to live in a healthy or beautiful greener earth? But we are not still working for it seriously. Some of us are working very hard to make our earth greener and on the other hand most of us are attempting to destroy it. We need to be together to save ourselves. We need to work together to stop global warming. We need to help each other. We should take this opportunity to make our earth pollution free. To make our beautiful earth more beautiful, we should run tree plantation program. Promise yourself every holiday or a free day you will run a tree plantation program. As well you will inspire others to do it. Never cut down trees. If you cut down trees, it has a great effect on our environment, nature and our existence. If you cut trees, it influences global warming to increase. Try to stay close to nature, try to make our beautiful earth greener. We can do it, yes we can, just need to be responsible, conscious and nature lover. So let us make Earth beautiful by staying close to the nature.

OUR HANDS ARE NEEDED TO MAKE THE EARTH BEAUTIFUL!

8 ways to keep the Earth Clean

By: Amanda Laverly

As individuals we have the potential to make a big difference and together we can make this Earth beautiful. By doing our part, we can be an inspiration and be a good example to others. The following are few easy and effective ways you can choose to reduce your daily impact and make a world of difference:

- BRING A BAG.**
Remember to bring reusable bags to the grocery store or for any other shopping activities to reduce consumption of disposable bags.
- INVEST IN A REUSABLE WATER BOTTLE.**
Acquiring a reusable water bottle would not only greatly reduce the amount of single-use plastic you use, but it would also save you money in the long run! If you're concerned about the quality of your tap water, consider using a water filter.
- BRING YOUR OWN REUSABLE CUP.**
Think about how many disposable cups are used every day in just your local coffee shop. Bringing a mug for your morning coffee can reduce the amount of waste you produce annually. Imagine how much waste we could reduce if we all made this simple daily change!
- REFUSE SINGLE-USE ITEMS.**
Take note on how often you rely on single-use items and choose to replace them with more sustainable versions. Refusing plastic straws and disposable cutlery when you go out and bringing your own containers for leftovers are a few ways you can start today.
- AVOID PRODUCTS WITH MICROBEADS.**
Facial scrubs and beauty products containing plastic microbeads were banned in the United States in 2015, but won't be fully phased out until 2019. Read the labels when purchasing products and opt for ones that contain natural scrubbing ingredients like salt or sugar.
- SHOP IN BULK.**
Consider the product-to-packaging ratio when purchasing items and choose larger containers instead of multiple smaller ones. When you have the option, also consider purchasing package-free foods and household goods.
- MAKE SURE YOUR WASTE GOES TO THE RIGHT PLACE.**
Do your best to ensure that the waste you dispose of ends up where it should. Recycle the materials that are recyclable in your area and make sure to reduce the likelihood of your garbage ending up in the environment by keeping a lid on your trash can when it's outside.
- COMPOST.**
Composting at home reduces the volume of garbage sent to landfills and reduces the chance of some products becoming marine debris.
